

RETURNS NOT COVERED UNDER WARRANTY

HEATER CORES

PRODUCT DAMAGE

New product that has been damaged during the course of an attempted installation.

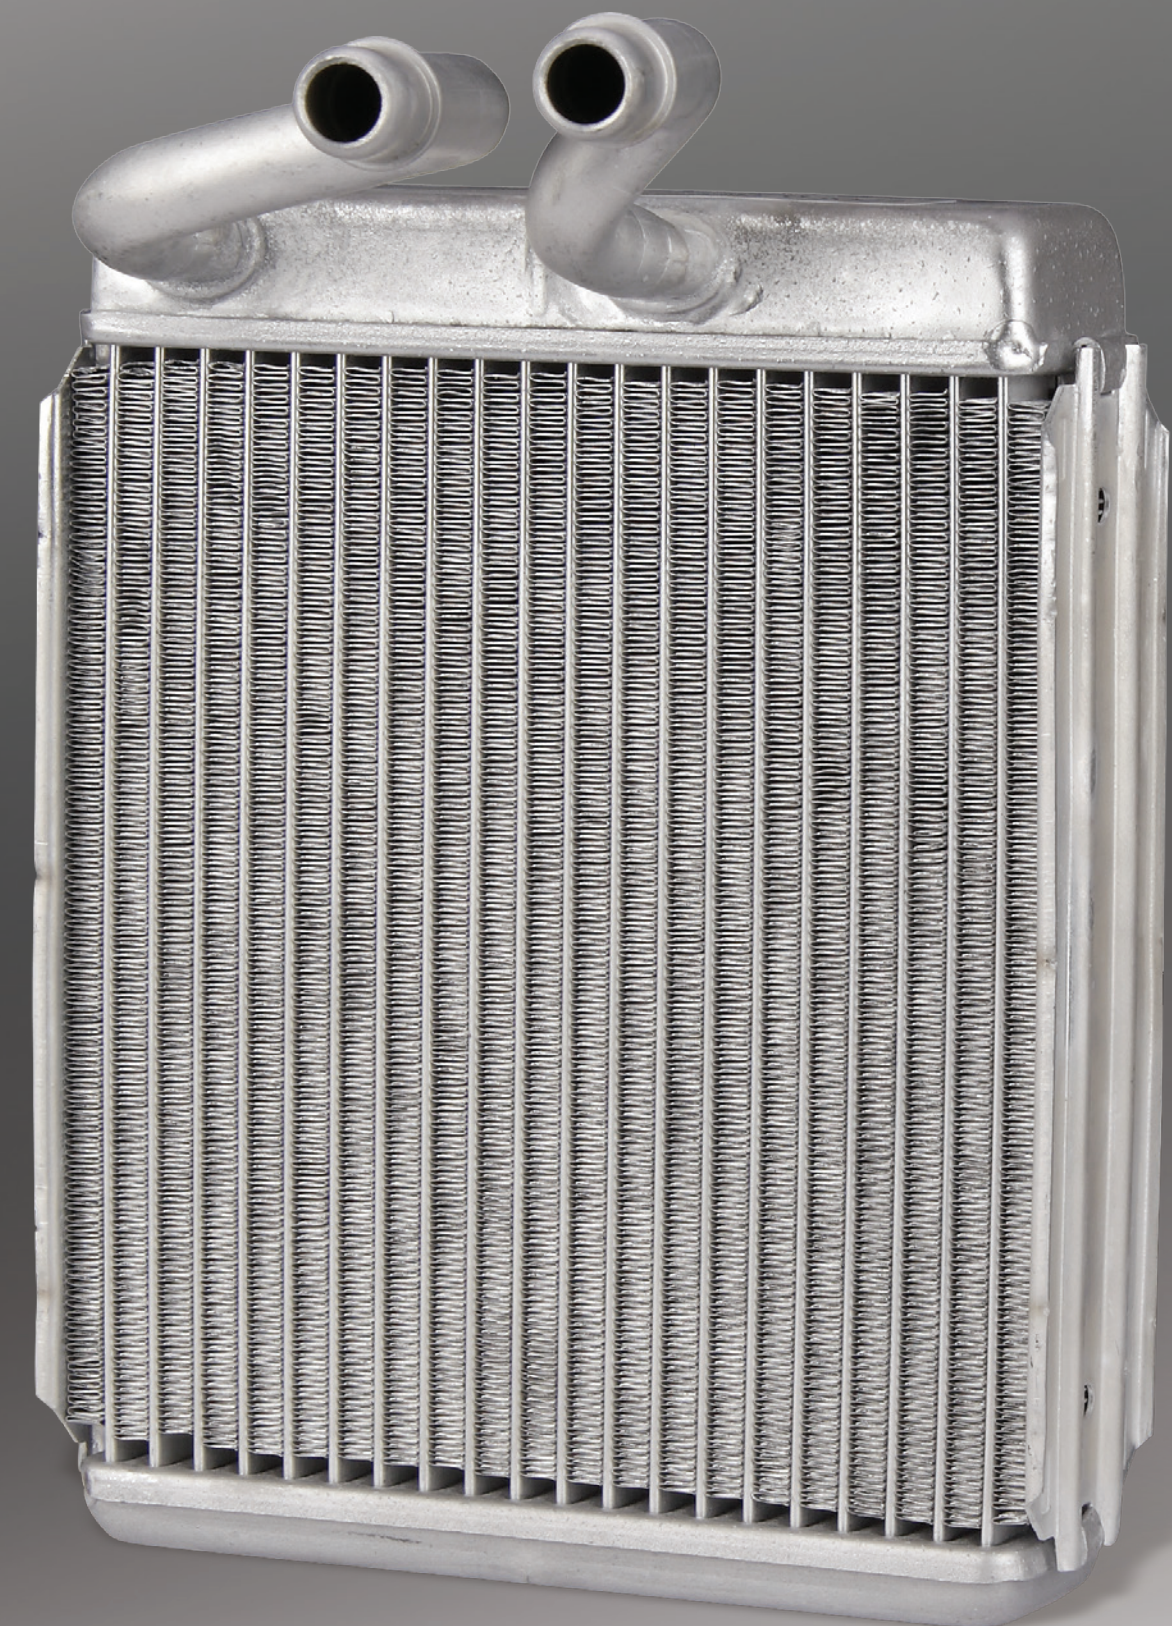

CONTAMINATED COOLANT

Rust color indicates coolant is contaminated from the result of oxidation or the mix of various coolants which causes premature erosion to system parts as well as diminishing the coolant's life expectancy.

ELECTROLYSIS

Blackened pipes show signs of electrolysis as a result of a poor ground from an electrical charge causing pin holes with time.
